

# ShoveboxList

## History

The shoveboxlist is a hierarchical list widget that combines the table and the tree widgets. It was published by Mark Libbrecht in the April 2001 edition of Foxtalk Magazine, entitled "You Can Push it Around in Your...ShoveBoxList".

The 'aha' moment for creating the shoveboxlist came up when playing the 'stay alive' board game ( from Milton Bradley - 1971):

## Behaviour and Characteristics

At the time of writing, the widget use HTML, CSS and plain vanilla javascript.
